

CHAIR OF ELECTROMAGNETIC COMPATIBILITY

multifaceted and above all fascinating range of topics that in general
electronic devices and systems without disturbances and failures.

undertaken at the chair for EMC at the Otto-von-Guericke University of
research, fundamentals and industrial applications shall complement

researchers as well as young doctoral candidates with different
work closely together in a helpful and pleasant atmosphere. The chair is also
one of the best EMC chairs at German universities. The outcomes of this are the
high quality of the research.

For example, it ranges from the teaching of the fundamentals of electrical
compliant EMC test and measurements to the comprehensive
research projects are the description of the stochastic electromagnetic field coupling
to a grid or the investigation of EMC effects in magnetic resonance
