

## **Magdeburg EMC-Industry-Seminars**

On Tuesday, 09 November 2021, an industrial seminar on electromagnetic compatibility (EMC) will be held for the 18th time in Magdeburg at the Experimental Factory, Sandtorstr. 23.

This series of events has been held annually in the past and was only interrupted by the "Corona -situation" in 2020. "Corona" has taken a lot out of all of us. Based on the current forecasts, we are full of confidence and want to dare a new start of the Magdeburg EMC Industry Seminars.

With this new start, we want to provide as broad a cross-section of information as possible on highly current and explosive EMC topics from EMC industry practice. These are intended to cover development, construction, quality assurance, planning, etc., in a wide range of areas. These should address the development, design, quality assurance, planning and other areas of work from the most diverse sectors and branches of industry and institutions.

The Magdeburg EMC Industry Seminars were initiated by the Chair of Electromagnetic Compatibility at the OvGU and have been continuously developed with interesting topics for EMC practice in industry. The Chair of Electromagnetic Compatibility at the OvGU has been in existence since 1998 and was taken over in 2008 by the current chair holder Prof. Dr.-Ing. Ralf Vick.

## **Registration for the next seminar**

### Information

#### **When?**

- November 09, 2021

#### **Where?**

- AMO Kulturhaus Magdeburg
