

OTTO VON GUERICKE
UNIVERSITÄT
MAGDEBURG

CHAIR OF ELECTROMAGNETIC COMPATIBILITY

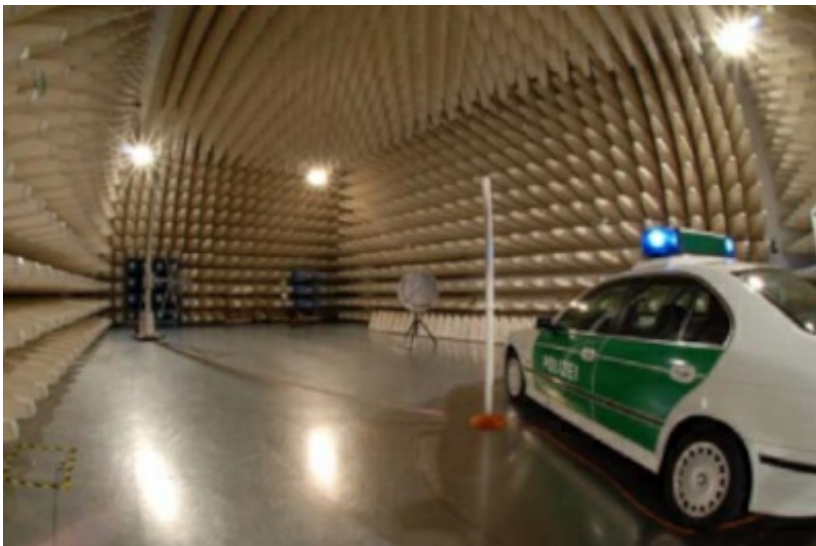

Industry

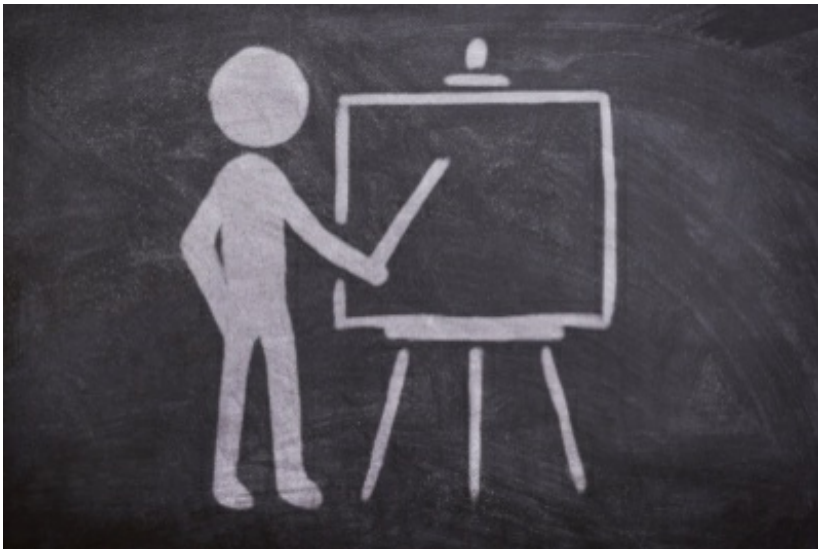

The cooperation with the industry is for the chair not only required, but desirable. Joined projects merge the practical and scientific point of view and by this way ensure applicability and progress on a high level.

The superior instrumentation and facilities of the chair offer the possibility to test and investigate new products without the need for own expensive equipment. Not only the pure measurement data acquisition stands to the fore, but also the analysis and interpretation by experienced EMC engineers on the basis of the valid standards. The success and growth of the annual EMC workshop held in Magdeburg is only one feature of many fruitful partnerships.
